NEW YORKERS plan their evenings to include a regular weekly visit to the Music Hall, while out-of-towners write "Music Hall" on a list of "musts"—because they know better motion pictures are shown here and the stage shows are without parallel anywhere—because they enjoy the brilliant work of the resident Corps de Ballet; the verve of the Glee Club; the thrilling routines of the Rockettes, the finest troupe of precision dancers in the world; and the Symphony Orchestra, which provides a satisfying prelude and background of fine music for each program—because the Radio City Music Hall is truly the SHOWPLACE OF THE NATION

The Music Hall, seating 6,200 persons, is the world's greatest theater. Stage highlights include productions based on Tschaikowsky's "Nutcracker Suite," Ravel's "Bolero" and "La Valse," Delibes' "Coppelia," "The Swan"—a tribute to the memory of Anna Pavlova, and Christmas and Easter pageants which are famous throughout the world.

ROCKEFELLER CENTER AT NIGHT

The luminous Rainbow Room occupies the entire eastern end of the 65th floor. Perhaps no other supper club in the world has been so highly praised. Its setting is distinguished—and unusual. Over the large revolving dance floor varicolored tones of light are reflected in glistening mirrors and crystal chandeliers.

The two-story-high walls are pierced by twenty-four large windows which afford an inspiringly beautiful view of New York by night. The Rainbow Room offers music by America's leading dance orchestras. Entertainment by world-famous artists. Open from 6:30 P.M. until 3 A.M. daily, except Sundays. Cocktails are served in the Lounge from 3:30 o'clock.

At the western end of the 65th floor is the intimate Rainbow Grill—especially favored for dinner and informal parties after theater. The Cocktail Hour is observed daily, including Sundays, from 3:30 P.M. to 7 P.M. The Grill is open on Sundays from noon—for "Breakfast in the Clouds" and for luncheon. Dinner is served until 9:30 P.M.

NBC STUDIO TOUR

EVERYONE who has ever listened to a radio program will thrill to the unforgettable experience of a behind-the-scenes tour through the Radio City studios of the National Broadcasting Company. Only through a tour—not a broadcast—can you appreciate the fascinating operations going on every minute behind these windowless walls.

Here, world-famous actors, comedians, prima donnas, conductors, popular vocalists, leaders of business and finance, statesmen, and educators—the greatest personalities of our times—pass across NBC's stage of the air playing to the largest audience of all time—the tens of millions of radio listeners.

Entertainment of such magnitude necessitates directing, editing, and timing to split-second accuracy a hundred programs a day... setting sound scenery with ingenious sound effects devices... dispatching programs...amid a glittering array of lights, switches, buttons, and dials—thousands of miles over two great nation-wide networks.

Only by taking the Radio City NBC Studio Tour with an experienced guide can you appreciate the tremendous ever-changing activity behind a broadcast. Tours lasting one hour operate every day in the year at ten-minute intervals from 9 A.M. to 11 P.M. The fee is 50c per person, plus 5c tax.
Instead of saying "Don't touch!" at the New York Museum of Science and Industry in the RCA Building, you are urged to "Press this button!" or "Do it yourself!"

That's why visitors enjoy themselves so much in this fascinating and unique "Hall of Motion."

Wheels go round, lights flash, bells ring, pistons drive, and machinery whirls as science goes through its intricate and thrilling maneuvers at the bidding of the layman.

Moving from one exciting action-exhibit to another, the visitor presses a button and sees a miniature streamlined train brought to a stop by the modern air-brake system; he twists another gadget and becomes a modern Benjamin Franklin or Alexander Graham Bell, experimenting with electricity or the telephone.

The most famous discoveries, inventions, and developments of the scientific world are gathered here for the visitor to see and operate as he will. Many of them are permanent exhibits of the Museum; others are temporary, being changed at frequent intervals to keep in step with the fast-moving march of scientific events.

The Museum is open every day in the week from 10 A.M. to 10 P.M. Admission 25c; children under 16, 10c.
